

Scientific Products Lyophilizer Windows 11 Upgrade

Ensure System Security & Performance

Microsoft has officially discontinued support for Windows 7, 8, and 8.1, with Windows 10 reaching end-of-life on October 14, 2025. If your Scientific Products Lyophilization System is running an outdated Windows version, your system is at risk of security vulnerabilities, operational failures, and unplanned downtime.

Why Upgrade Now?

- **Security & Compliance** – Unsupported software increases cybersecurity risks and regulatory concerns.
- **Performance & Reliability** – Older operating systems may lead to instability, causing costly production downtime.
- **Future-Proofing** – Upgrading ensures long-term support, compatibility, and access to the latest features.

What We Offer

Our upgrade service includes:

- A **seamless transition** to Windows 11 with minimal disruption.
- A **complimentary assessment** of your Lyophilization system's controls platform and hardware.
- Recommendations on additional upgrades to extend equipment lifespan and enhance efficiency.

Act Now. To schedule your upgrade or request a system assessment, contact us today.
